knowledge on how clinical trials are planned, carried out, analysed and reported. MSc students will also apply the skills they have learnt to a particular problem and produce a written report.

Learning, teaching and assessment strategies

The programmes are primarily delivered using the internet. All the learning materials (with some minor module-specific exceptions) and study activities for the programme are available online. The online learning environment includes ‘try it yourself’ questions with hints and feedback; animations, interactive diagrams and table

Student support and guidance

The following summarises the support and guidance available to students:

Student Guide: This provides information which is common to all students and gives guidance on a range of issues from the start of a student's relationship with the University of London through to their graduation.
